The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/527,417	Applicant(s) SAKANE ET AL.	
	Examiner JONATHAN ML FOREMAN	Art Unit 3736	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 - 11, drawn to a medical guide wire.

Group II, claim(s) 12 - 18, drawn to a method of manufacturing a medical guide wire.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical features common to Group I and Group II include a guide wire of uniform thickness or a tapered tip having a fluororesin coating layer, wherein particulate matter is present in the coating layer and baked with the coating layer to form surface protrusion-shaped projections. However, these features do not make a "contribution" over the prior art and therefore does not constitute a "special technical feature" with respect to inventive step. U.S. Patent Application Publication No. 2002/0082524 to Anderson et al. disclose a guide wire having a uniform thickness or a tapered tip (Figure 4) which includes any fluoropolymer coating [0019]. U.S. Patent No. 6,291,054 to Thomas et al. disclose a fluoropolymer coating having particulate matter present in the coating layer baked with the coating layer to form surface protrusion-shaped projections (See Abstract). Because it would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the fluoropolymer coating

Art Unit: 3736

disclosed by Anderson et al. with the fluoropolymer coating as taught by Thomas et al., the common technical features do not constitute a “special technical feature” with respect to inventive step.

3. A telephone call was made to Douglas P. Mueller on 9/30/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JONATHAN ML FOREMAN whose telephone number is (571)272-4724.

The examiner can normally be reached on Monday - Friday 8:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571)272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
